Fabrication & Modularization

Fabrication and Modularization is a core service offering by Graham in the Energy Sector with fully operational and fabrication shops in Bonnyville, Cold Lake Alberta municipalities as well as Saskatoon, Saskatchewan.

Graham is one of the most experienced service providers for in-situ facilities, oil sands, gas processing plants, refineries and other industrial plants. We are able to self-perform a range of module, piping and vessel repair activities to support our clients. In doing so, we maintain tighter controls of a project's quality, cost and schedule. We work with Carbon, Stainless, Chrome, Hastelloy, Monel, Inconel; FRP and HDPE; Module Erection, in-house welders, pipefitters and QC for fabrication, NDE, and hydro-testing.

Graham's comprehensive fabrication and modularization capabilities include:

- Project Management
- Modular Fabrication
- Modular Assembly & Installation
- Pipe Fabrication
- Quality Focused Processes and Procedures
- CWB Certification
- Vast Storage & Space
- Schedule & Budget Adherence
- Skilled Craft Personnel
